

### **Canary dogs**

We are all concerned about bird habitats. I would like someone to prove that nest damage was caused by dogs, and not the foxes, boars and coyotes that are roaming the island. I have a hard time believing that even experts can make out what is destroying the nests. I fear that the four wheelers chasing people are doing more damage to the ecosystem, not to mention the turtle nests.

The truth of the matter is that people who want to ban dogs would also like to remove all people from Shell Island. This is just a start. The island is not a bird sanctuary. It is a park for the people.
